

# Advanced Product Comparison and Wishlist Pro

v1.0.0

Adds ability for customers to compare products and create wishlists.

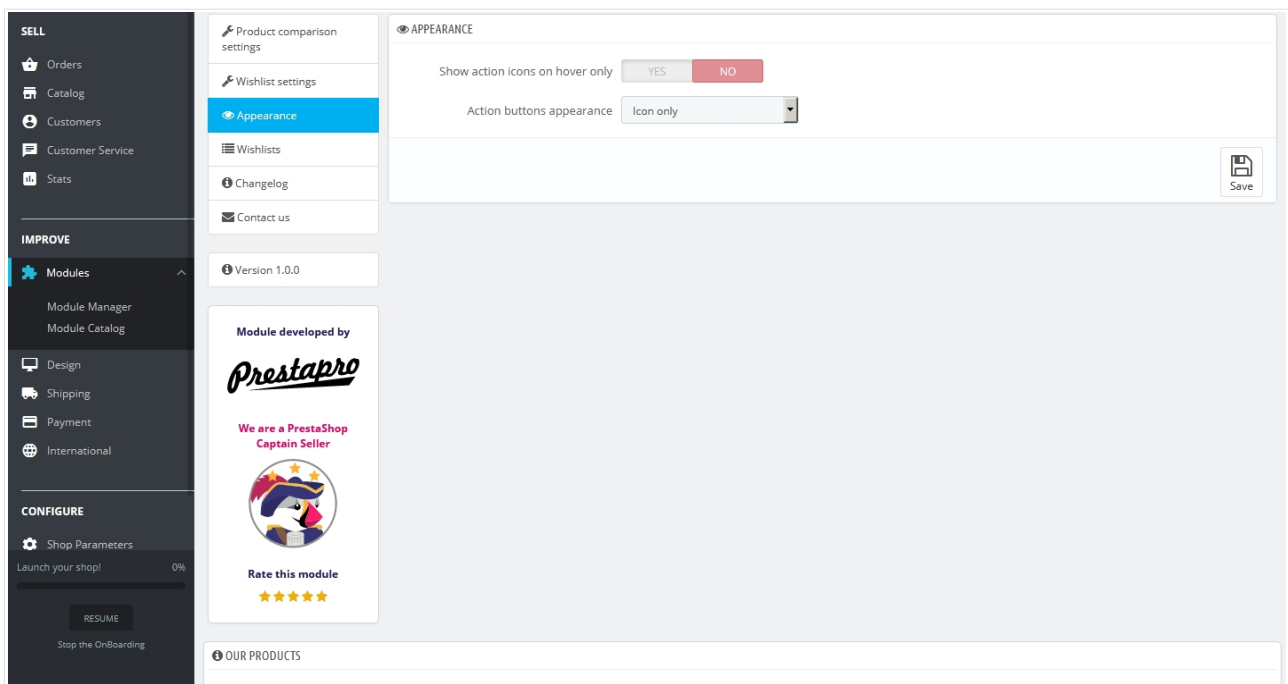

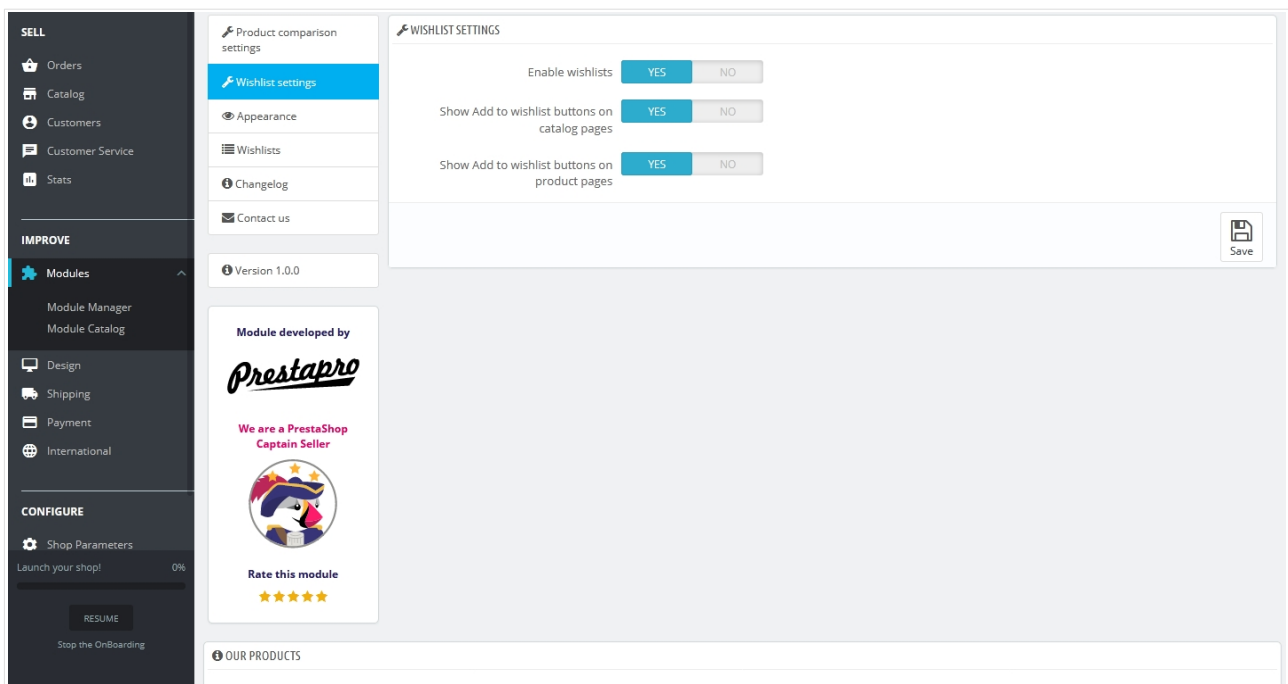

## Installation

*Advanced Product Comparison and Wishlist Pro* is installed like any other module. Simply upload your archive to install it.

## Configuration

The module is ready to use after installation. On the module configuration page, you can enable or disable certain functionality or change appearance and behavior of different parts of the module. For example, you can choose where the action buttons will be shown and how the comparison table will look like.

The screenshot displays the PrestaShop administration interface. On the left is a dark sidebar with navigation menus: 'SELL' (Orders, Catalog, Customers, Customer Service, Stats), 'IMPROVE' (Modules, Design, Shipping, Payment, International), and 'CONFIGURE' (Shop Parameters). The 'Modules' menu is expanded, showing 'Module Manager' and 'Module Catalog'. The main content area is titled 'PRODUCT COMPARISON SETTINGS'. It features a left-hand menu with options: 'Product comparison settings' (selected), 'Wishlist settings', 'Appearance', 'Wishlists', 'Changelog', and 'Contact us'. Below this menu, it states 'Version 1.0.0' and includes a 'Module developed by Prestapro' section with a logo and a 'Rate this module' section with five stars. The main settings area contains the following options: 'Enable product comparison' (YES/NO), 'Show compare product buttons on catalog pages' (YES/NO), 'Show compare product buttons on product pages' (YES/NO), 'Comparison page layout' (Single column), 'Comparison table navigation' (Scroll), 'Products per view (desktop)' (5), 'Products per view (tablets)' (5), 'Show product condition in comparison table' (YES/NO), 'Show product brand in comparison table' (YES/NO), 'Hide features by default in comparison table' (YES/NO), and 'Show link sending form' (YES/NO). Each setting has a corresponding 'YES' or 'NO' button. Some settings have descriptive text below them, such as 'Select the maximum number of products that will be shown at once (i.e. without scrolling) in the comparison table in desktop browsers.' for the desktop products per view setting. At the bottom right of the settings area is a 'Save' button.

## Usage

After installation, buttons for adding products to comparison and wishlist will appear on catalog and product pages. While wishlist functionality is only available to registered and logged-in users, product comparison can be used by all visitors of your site. Links to comparison table and wishlist (along with the number of products added to them) are shown at the top of every page. These pages can also be accessed from individual user accounts.

This module is compatible with the *Product Feature Tooltips* module. All feature descriptions you create with the help of *Product Feature Tooltips* will be available as tooltips in the product comparison table.
