# Simple Tabs

v2.1.0

Adds a tabbed description section to product pages in the front office.

Installation

Simple Tabs is installed like any other module. Simply upload your archive to install it.

Usage

Back office

After installation, a new configuration section will appear in the *Modules* tab on the product editing page. It provides a list of all tabs created for this product.
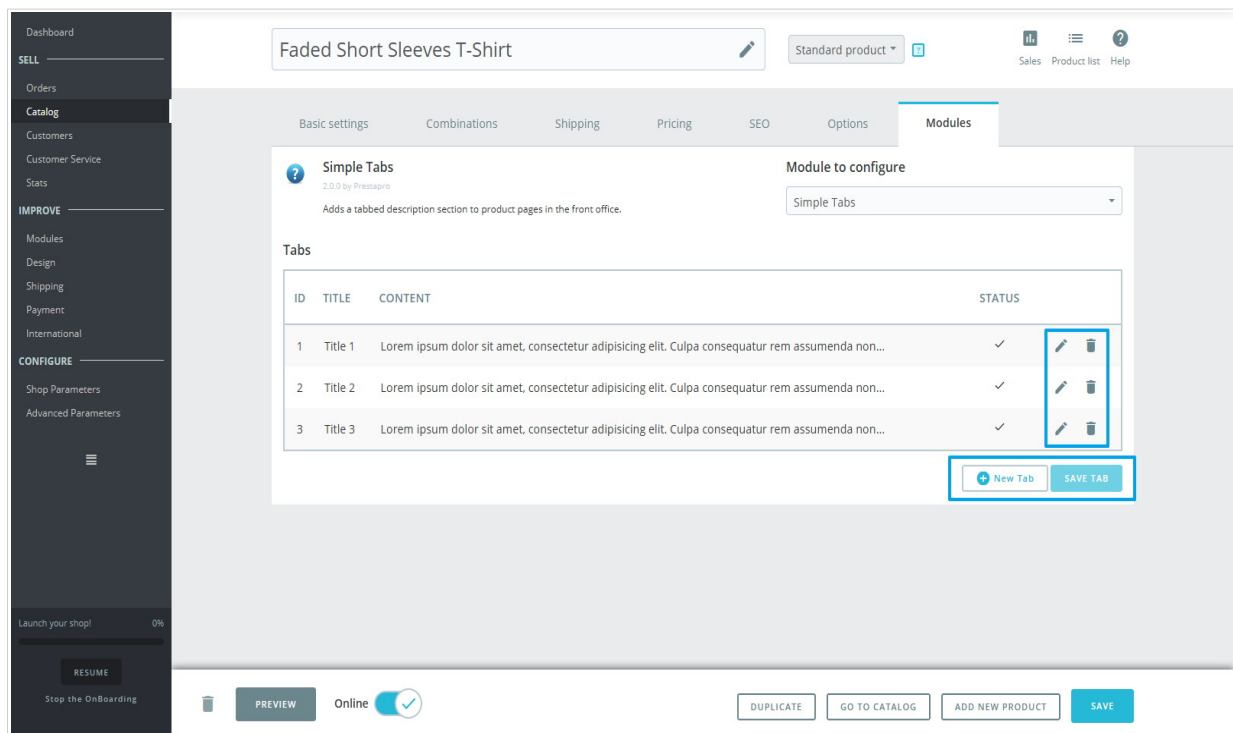

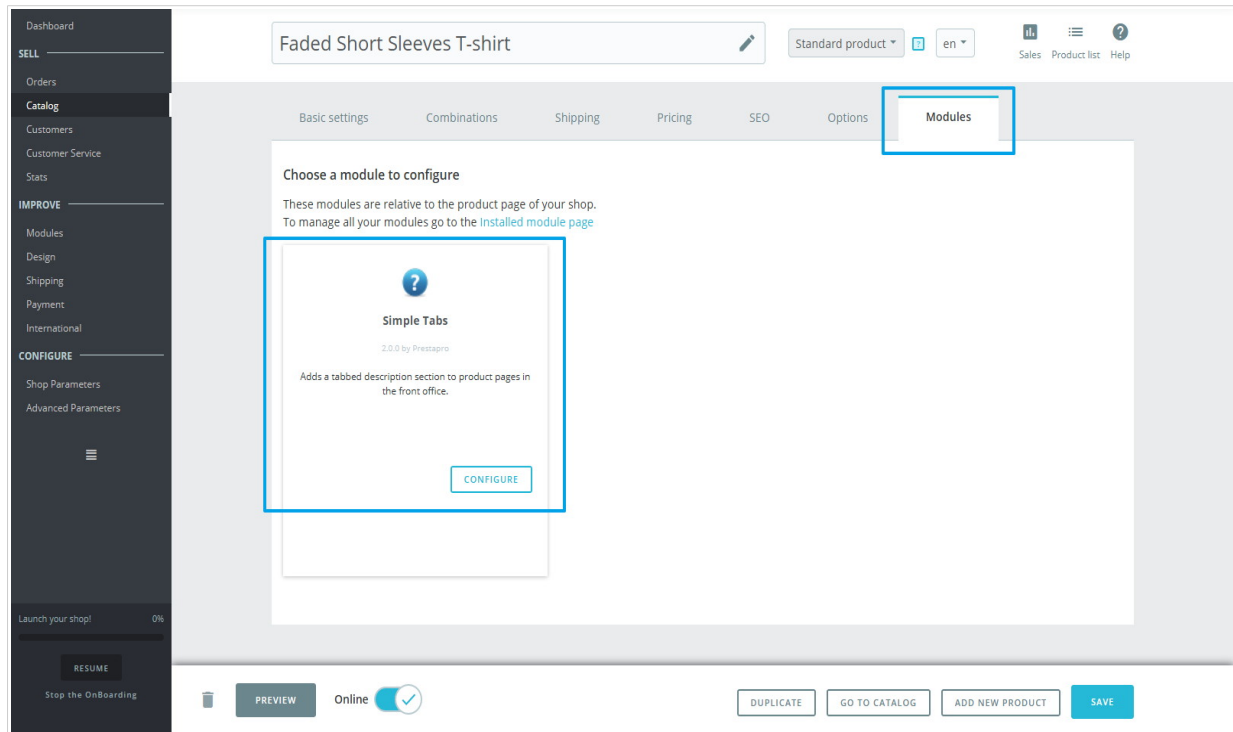

To add a new tab, click **New tab**, fill out the form below the tab list and click **Save tab**. To hide a tab and its content from the front office, set the *Enabled* switch to **No**. Clicking **Cancel editing** will discard any unsaved changes. To edit or delete an existing tab, use buttons located in the rightmost column of the tab list.
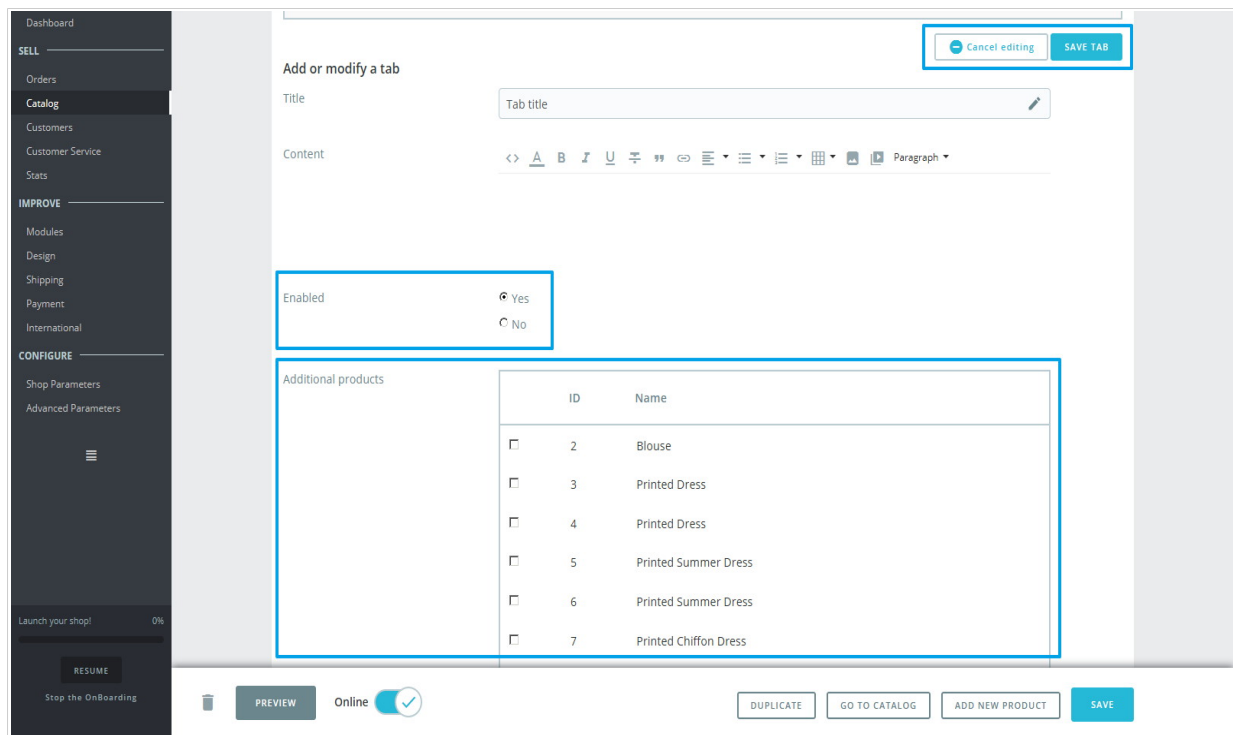

You can assign the same tab to more than one product. Simply check corresponding boxes in the *Additional products* field when adding or modifying a tab. If you want to assign a tab simultaneously to all products in specific categories, use the *Additional categories* field.

Front office

After you assign at least one tab to a product, a new tabbed section will appear in the description area on that product's page.
